PROFESSIONAL SUMMARY

Experienced software developer with a proven track record at various companies, enhancing applications and optimizing user experiences. Skilled in CI/CD pipeline design and technical documentation, I excel in problem-solving and project management, driving successful product rollouts and compliance initiatives. Committed to leveraging technology for impactful solutions.

SKILLS

- Analytical Skills
- Project Management
- Technical Documentation
- Risk Management
- User Experience Design
- CI/CD pipeline design
- API Integration
- Software Architecture Design
- Application Programming
- Docker Configuration
- Git Workflow Management

PROFESSIONAL EXPERIENCE

Freelancer

Freelance Developer | May 2025 - present

- Built and configured small consumer server, utilizing Docker and self-hosted solutions.
- Developed various web applications from concept to deployment for small business clients.
- Projects include Inventory Management, Service Bookings and Financial Client Management.
- Integrated AI assistants to enhance development, testing, and documentation processes.
- Researched self-hosted LLMs to improve productivity and automate workflows.
- Designed CI/CD pipelines to automate multi-client deployments, improving consistency and reducing release time.

Stavvy

Senior Software Developer | June 2024 - May 2025

- Delivered Tier 2/3 technical support for fintech web applications within real estate and mortgage ecosystems, diagnosing and resolving complex production issues to maintain system reliability.
- Investigated and optimized application performance, reducing latency and improving user experience across high-volume transaction workflows.
- Partnered with cross-functional teams including marketing, operations, and compliance to successfully launch and scale MERS-integrated solutions, ensuring alignment with industry standards and user adoption goals.
- Authored and maintained detailed technical documentation for APIs, integrations, and system architecture, supporting regulatory audits, onboarding, and long-term maintainability.
- Collaborated closely with stakeholders to translate business requirements into scalable software solutions, contributing to roadmap planning and feature prioritization.
- Established and promoted development best practices, including code quality standards, documentation processes, and structured reporting for project visibility.
- Assisted in troubleshooting integration issues involving third-party services (e.g., mortgage registries, document systems), ensuring seamless data flow and system interoperability.

HRplus Software Limited

Software Developer | October 2022 - May 2024

- Led software modernization at HRPlus, enhancing Reporting/BI systems with diverse tech tools.
- Collaborated with the IT department for ISO 27001 certification, aligning documentation and compliance processes.
- Created system documentation for core products, aiding audits and continuity strategies.
- Resolved client technical issues through effective cross-functional collaboration.
- Gained experience in contributing to the complete software development lifecycle.

Met Office TT

Web Developer | August 2020 - August 2022

- Served as a Web Assistant at TT Met Office, acquiring expertise in diverse technologies and programming languages.
- Conducted software development training for internal teams to enhance technical skills.
- Executed on-site system updates and troubleshooting to ensure optimal performance.

Web Developer (Volunteer) | August 2018 - August 2019

- Facilitated development of Climate Report Management System enabling upload and extraction of weather records from valid file types and report generation.

EDUCATION

2016 - 2019 | University of the West Indies

Bachelor of Science in Computer Science

CERTIFICATES

09 Sept 2023 | IEEE

Introduction to Power BI
